

I listen to XM Radio's New York Metro traffic and weather channel every day on my commute. I feel that the complete lack of quality on FM channels in terms of up to date weather and traffic information is abhorrent and is the reason I started \*paying\* for XM RADIO instead. Under no circumstances should the NAB's petition 04-160 be approved! It is not for them to say what I listen to on XM RADIO, and I respectfully urge the FCC to reject their petition and please ALLOW XM RADIO services to provide XM Instant Traffic & Weather as it is a highly beneficial service and I would be terribly ashamed of the FCC if it felt it had the right to override XM's ability to provide quality programming as provided in our FIRST AMENDMENT RIGHTS. Thank you.
